R E S O L U T I O N

BE IT RESOLVED by City Council in council assembled this 11 day of April 1961 that the following revisions of plans for improving Broughton Street (U.S. Route 178) from Scoville Street to U.S. 178 By-Pass, as proposed by the State Highway Engineer in his letter of April 1, 1961 to the City Administrator, be and are hereby approved;

- "1. The construction of a concrete sidewalk along the west side of this section of project has been eliminated. If a meter is tested at the consumers' request more than once in any six month's period, the consumer shall pay a service charge of \$5.00 for such service, but in the event the meter is found to be more than 3% fast, then the consumer will have his bill adjusted as stated above and no service charge will be applied.

RESOLUTION

A PETITION OF PROTEST

WHEREAS, The Federal Communications Commission is now considering under Docket Number 14245 the elimination of VHF television service in Columbia, South Carolina (WIS-TV), under a plan described as deintermixture; and

WHEREAS, The Federal Communications Commission procedure here involved permits those parties who are adversely affected to file comments by December 4, 1961,

NOW, THEREFORE, BE IT RESOLVED by the Mayor and City Council of the City of Orangeburg that said Council does; by this petition, and for the following stated reasons, hereby formally protest the Federal Communications Commission action being considered in Docket Number 14245:

1. WIS-Television's VHF service is the only reliable television service with high quality signal presently available in Orangeburg and Orangeburg County. Should the FCC proposal be put into effect, this VHF service would be destroyed.
2. There are very few UHF television sets or UHF converted television sets in the City or County of Orangeburg.
3. The present UHF service in Columbia does not reach Orangeburg.
4. The citizens of Orangeburg and Orangeburg County depend upon WIS-Television for public service and public information programs.
5. The area depends upon WIS-TV in Columbia for its news. If Channel Ten were made into a UHF station, Orangeburg would lose this service.
6. Orangeburg is one of the richest farming counties in South Carolina, and WIS-Television's farm programs provide current farm reports from the state capital. These valuable farm reports would be lost to the area through a lack of VHF service.
7. WIS-Television provides the only reliable television coverage which visitors and tourists to the area can receive when stopping at hotels and motels in the area, and loss of Columbia's VHF station would also be damaging in this respect to Orangeburg.
8. The television dealers of Orangeburg and surrounding area have, since 1953, been working closely with WIS-Television to improve reception of the VHF station.

9. WIS-Television has sent crews into Orangeburg several times to cover local events of statewide importance, thus offering the city and county television coverage to a wide area of the state which would be lost if VHF service were eliminated in Columbia.

10. WIS-Television has done an excellent job of providing the best possible television service for the City and County of Orangeburg. The loss of this VHF service to the citizens of Orangeburg and Orangeburg County would mean that the area's communications would suffer.
