

AN ORDINANCE AMENDING THE CITY OF ORANGEBURG DEPARTMENT OF PUBLIC UTILITIES OPERATING BUDGET FOR FISCAL YEAR ENDING SEPTEMBER 30, 2022. (DPU HAMPTON STREET SEWER PROJECT)

THE CITY COUNCIL OF THE CITY OF ORANGEBURG ORDAINS:

SECTION 1. The costs associated with the referenced project for the City's wastewater utility system are expected to exceed the existing budget of \$375,000.00 by an amount not greater than \$775,000.00, for a total amended budget of \$1,150,000.00. This project will also accept a matching grant of \$500,000.00 from the SC RIA, which will reduce the project cost to a net amount of \$650,000.00. The City Council authorizes and appropriates these additional funds as an additional cost of the Department of Public Utilities planned project as provided in general ledger code 5 105.000.000 and work order code WWC 1903.

SECTION 2. In all other respects, except as provided in this Ordinance, the budget for the City related to the Department of Public Utilities for the fiscal year ending September 30, 2022, remains in full force and effect.

SECTION 3. All ordinances, resolutions, orders, or other administrative actions in conflict with this Ordinance, only to the extent of that conflict, are repealed.

ENACTED BY the City Council on June 21, 2022.

Wastewater Division – Project #3

Country Club Estates Rehabilitation

- I. Purpose – This project will reduce inflow and infiltration (I&I) in the Country Club Estates Wastewater Collection System. During heavy rain events, this system is inundated with I&I that causes sanitary sewer overflows and high run times on the associated pump station.

- II. Rationale – The wastewater system in this area was constructed of terra cotta (clay) pipe and concrete block manholes that have deteriorated, allowing the introduction of I&I. During heavy rain events, the wastewater system takes on water through these deficiencies and causes sanitary sewer overflows that have the potential to create a health hazard.

- III. Plan – To identify these deteriorated pipe segments and replace with PVC pipe, and replace the block manholes with pre-cast concrete manholes.

IV. Cost

Engineering	\$ In house
Construction	350,000
Contingencies	<u>\$ 25,000</u>

TOTAL PROJECT COST \$ 375,000

TOTAL PROJECT EXPENDITURES –to-Date \$ -0-

TOTAL PROJECT COST REMAINING \$ 375,000

V. ESTIMATED 2021 – 2022 COST \$ 125,000
